new! 9.1. Browser API Access Restrictions

Because VuePress applications are server-rendered in Node.js when generating static builds, any Vue usage must conform to the [universal code requirements](#). In short, make sure to only access Browser / DOM APIs in `beforeMount` or `mounted` hooks.

<code>java.lang.ProcessBuilder</code>	<code>java.lang.Process</code>
<ul style="list-style-type: none">- <code>directory</code>: File- <code>redirectErrorStream</code>: boolean+ <code>ProcessBuilder(command: String[])</code>+ <code>ProcessBuilder(command: List<String>)</code>+ <code>command</code>: List+ <code>command(command: List<String>): ProcessBuilder</code>+ <code>command(command: String[]): ProcessBuilder</code>+ <code>directory</code>: File+ <code>directory(directory: File): ProcessBuilder</code>+ <code>environment</code>: Map+ <code>redirectErrorStream</code>: boolean+ <code>redirectErrorStream(redirectErrorStream: boolean): ProcessBuilder</code>+ <code>start</code>: Process	<ul style="list-style-type: none">+ <code>destroy</code>+ <code>exitValue</code>: int+ <code>getErrorStream</code>: InputStream+ <code>getInputStream</code>: InputStream+ <code>getOutputStream</code>: OutputStream+ <code>waitFor</code>: int

Pasaremos los datos necesarios para construir un objeto ISBN al constructor de Libro (en nuestro caso una cadena con el isbn) y será este quien lo cree. En el fondo esto es lo que sucede con un tipo valor como `Date` por su 'naturaleza'. De esta manera, además, el objeto `Isbn13` que estoy creando desaparecerá junto con el libro.

If you are using or demoing components that are not SSR friendly (for example containing custom directives), you can wrap them inside the built-in `<ClientOnly>` component: ♥

```
1  # Post Here Code Example
2  function base(a, b)
3  {
4      print "hola";
5      "123456789012345678901234 567890123456789 01234567890123456789012345 6789012345678 90
6  }
```

```
1  # Post Here Code Example
2  function base(a, b)
3  {
4      print "hola";
5      int i;
6      i=a;
7      b=a*i;
```

```
8
9     return i;
10 }
```

```
